

Bi-Level Training Desks Enhance Instructor/Student Lines-Of-Sight and Simplify Monitor/Cabling Accessibility for Technical Support

The unique Technical Access Furniture bi-level design recesses the rear portion of the Training Desk to provide full screen visibility with line-of-sight over the monitor. The screen angle is positioned for minimal glare and comfortable viewing; legroom is maximized, and a bumper edge defines individual positions.

Monitor access is unencumbered and cable connections are accessible to technical support personnel for troubleshooting and service. The TAF Training Desk is available in a range of sizes and finishes, with cable management and CPU support options to meet your specific requirements.
