

Precision craftsmanship and attention to detail enhance the architectonic elements of this reception desk design for C.E. Unterberg, Towbin.

Contrasting brushed stainless steel, ebonized oak and a beveled-edge place glass transaction counter make this a striking reception desk design. Repeated on three floors of the new Manhattan headquarters of C.E. Unterberg, Towbin and designed by Robert Spataro of Mancini Duffy, the reception desk components were factory-built and pre-assembled before shipping, insuring precise fit, finish and dimensional accuracy for the final on-site installation.

Datamation brings a design perspective, superb craftsmanship and short lead times to critical fabrication details using materials that include textured stainless steel, aluminum, glass, solid and veneered hardwoods, plastic laminates, stone and other solid core surfaces.
