

Modular Healthcare Solutions

Nurses Station components are shown with cherry veneer panels and protective bumper edges for the transaction counter and base. Exterior design and material specified by the architect for both our straight and curved core structures.

All Datamation Modular Healthcare Solutions feature:

- Architect controlled design and material options
- Sizes to meet specific project requirements
- Precision factory craftsmanship
- Modularity for easy reconfiguration or future add-ons
- 7 year depreciation life vs. 31 years for millwork
- Limited lifetime warranty
- Quick on-site installation
- Availability in a wide range of standard or customer specified colors and finishes

Nurses Stations

Datamation's Modular Nurses Stations offer design, size and materials flexibility – all of the benefits of custom millwork – at standard product pricing. We start with a pre-engineered, modular core structure that incorporates work surface supports, cable management and bumper options, then construct exterior surfaces to the design and materials specifications of the contract.

Our computer controlled factory manufacturing ensures precise fit and finish of all components, and modular construction minimizes onsite time and activity to provide a clean non-disruptive installation.
