

# Modular Healthcare Solutions

---

## **All Datamation Modular Healthcare Solutions feature:**

- Architect controlled design and material options
- Sizes to meet specific project requirements
- Precision factory craftsmanship
- Modularity for easy reconfiguration or future add-ons
- 7 year depreciation life vs. 31 years for millwork
- Limited lifetime warranty
- Quick on-site installation
- Availability in a wide range of standard or customer specified colors and finishes

Bumpers can be integrated with surfaces as design elements, providing protection from carts and traffic.

Exterior materials and design treatments are limited only by the architect's imagination. Half or full height panels in laminate or veneer finishes are supported by the core structure system. Modular construction details also allow easy replacement in case of damage.

## **Nurses Station: Designer Options**

Datamation pre-engineers the core structure of its Nurses Station modules, allowing architects the freedom of treating the exterior surface materials and design to meet their project's overall aesthetic objectives.

In addition to laminates, granite, marble and solid surfaces are transaction top material options. Exterior fascia surfaces can reflect other interior design elements in laminates or wood veneers. And modular construction details allow a damaged exterior surface to be economically replaced.
