

Ergonomic work surface, including monitor arms, is fully adjustable for different operators or sit/stand access. Desk support structure is epoxy coated steel.

Continuous raceway, with hinged protective lid, provides cabling access from above and below the work surface.

Tower support platform pivots for full tower accessibility from either front or rear of console.

This fully adjustable console workstation is engineered for mission critical operation with an electrically actuated work surface for sit/stand operation. Built-in features include an acoustic tack board back, front and rear tower cabinet access and a continuous cable raceway with hinged lid for easy access. This value-engineered design, also available in a fixed height configuration, offers unique cost and functional benefits.
